Hybrid Watch

How to set the analog/digital time, date, & day:

To set the analog time, gently pull out the crown, & turn it clockwise to adjust the hands.

To set the digital time, first of all, make sure that none of the digits on the face are flashing on/off. Push button C 3 times. You will see the digital seconds, in the bottom dial, flashing on/off. If you wish to reset the seconds to zero, press button B once. Next, push Button D once. You will see the hour digits flashing in the bottom dial. To change the hour, push button B. You can have the hour in AM/PM format, or 24 hour format. A letter A, P, or H, in the bottom dial, will tell you which format is active. Once the hour is correct, push button D once. You will see the minute digits flashing. To change the minutes, use button B. Once set, push button D once again, & you will see the date digit(s) flashing in the right dial, at the 3 o'clock position. Change this with button C. Next, push button D once again to move to the month digit(s), at the top, & again change them with button C. Lastly, push button D once. You will see the day dial at the top, flashing on/off. Use button C to change the day to the correct one. Once everything is set successfully, push button C once to exit the setting mode, & return to the normal time display.

How to operate the chronograph/set the alarm/hourly chime:

From the normal time display, push button C once. Push button B to start, & stop, the chronograph/stopwatch. Once stopped, push button D to reset the stopwatch to zero. Push button C once, to return to the normal time display.

To set the alarm, push button C twice. To turn the alarm on/off, push button B. In the left dial, at the 9 o'clock position, when the alarm is on, ALM will be illuminated, & visa versa. To set the alarm time, push button D to alternate between the hour & minutes, & button B to change either. To return to the normal time display, push button C once.

To turn the hourly chime on/off, push button C twice. In the left dial, you can see it is divided into 3 sections. If you push button B, first it will turn on the alarm, the section for which will illuminate. If you push button B again, the section marked SIG will illuminate - this is the hourly chime, & is now turned on. When it is not illuminated, it is off. Pushing button B a third time will illuminate both the alarm, & hourly chime sections, meaning both are on. Push button C once, to return to the normal time display.

Warranty:

This warranty service run by: Timepieces International Inc, 12800 NW South River Drive, Medley, FL, 33178, with the authorization of Daniel Steiger.
