### The Hampshire Watch

#### How to set the day, date, & time:

- This is an automatic watch. It doesn't have a battery. It runs on power generated by wearing the watch on your wrist. You can give the watch some initial charge, or a boost, by turning the crown clockwise for a minute or so, whilst it is still pushed in.
- To set the day, pull the crown out gently to the first click position, and turn it clockwise to adjust the day in the top window.
- To set the date, pull the crown out gently to the first click position, and turn it counter-clockwise to adjust the date window on the right side.
- To set the time, pull the crown out gently to the second click position (as far as it will comfortably go), and turn to adjust the hour and minute hands.
- Always ensure that the crown is pushed back in tightly, and that it is flush against the watch case.

### Warranty:

This warranty service run by: Timepieces International Inc, 10701 NW 140th St, Hialeah, FL, 33018, with the authorization of Daniel Steiger. This warranty covers the watch movement against manufacturer’s defects for 5 years from date of purchase. Within the period your watch will be repaired free of charge, except for a handling and transportation fee ($29.95). This fee must be enclosed when returning your watch for service. We cannot accept responsibility for damage or loss caused in transit.

### Important: Not covered by warranty

1.) Case, glass and band
2.) Damage caused through accidents, misuse, neglect, or inexpert repairs
3.) Any discoloration, or wear
4.) Any loss or damage whilst the watch is not in our possession, including transit by any means
5.) Any consequential loss whatsoever and how so ever arising, so be accepted by us
6.) Batteries
