The Jaguar Watch

How to set the time, date, & dual time:

To set the primary time/date, gently unscrew the crown counter-clockwise, & pull out. Pull the crown out to the first click position, & turn it clockwise to adjust the date. Pull the crown out to the second click position, & turn clockwise again to adjust the hands for the time. Once complete, push the crown back in, & screw it in clockwise, ensuring that it is tight & flush against the case.

Before setting the dual time dials - 24 Hour at the top, 12 Hour at the left, & 60 Minutes at the bottom - you must ensure that the hands on all those dials are at the 12 o’clock position. If they are not, follow the succeeding procedure to adjust them.

Unscrew & pull out the crown to the second click position, & then hold down Buttons A & B, together, for at least 2 seconds, to enter the reset mode. (The top & bottom dials will move at this point, but they will each just do one revolution. You can ignore this) Push Button A to adjust the 24 Hour dial, & use Button B to adjust the 12 Hour, & 60 Minute dials; these two dials are linked, so they will move together. Holding down either button will allow you to move the hands at a faster rate. When the dials have been reset to the 12 o’clock position, push, & screw the crown back in.

How to set the time, date, & dual time (cont):

Push Button A, or Button B, to adjust the dual time dials. Each push of either button will adjust all 3 dials by 1 hour. Pushing Button A will move 1 hour counter-clockwise. Pushing Button B will move 1 hour clockwise. In this way, it is very easy to set the dual time dials to a different time zone, and back again, when travelling.

Please note that it is not advised to set the date any time between 9pm and 1am, otherwise the date may not change properly, due to the way that the watch mechanism works.

There are no markings on any of the small dials, on the face, because this watch has been especially designed with a minimalist style in mind.

Warranty:

This warranty service run by: Timepieces International Inc, 12800 NW South River Drive, Medley, FL, 33178, with the authorization of Daniel Steiger.
