<tbody>
<tr>
<td>N : normal</td>
<td>Free</td>
<td>Time setting</td>
</tr>
<tr>
<td></td>
<td>- Turn counterclockwise for date change</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Turn clockwise for day of the week change</td>
<td></td>
</tr>
</tbody>
</table>

◆ **How to set time**

1. Pull the crown out to the 2nd click position when the second hand is at the 12 o’clock position.
2. Turn the crown to set the hour and minute hands.
   - Take a.m./p.m. into consideration when setting the hour and minute hands to the desired time.
   - When setting the minute hand, advance it 4 to 5 minutes ahead of the desired time and then turn it back to the exact time.
3. Push the crown back to the normal position.

◆ **How to set date and day of the week**

1. Pull the crown out to the 1st click position.
2. Turn the crown to set the date and the day of the week.
   - Do not set the date and day of the week between 9:00 p.m. and 4:00 a.m.
3. Push the crown back to the normal position.

**Tips:** When the date and the day of the week changes during daytime, it happens when a.m./p.m. is wrongly set. Advance the hour hand by 12 hours.

◆ **Power depletion warning function**

When the battery nears its end, the second hand moves at two-second intervals instead of the normal one-second intervals. In that case, have the battery replaced with a new one as soon as possible.

- The watch remains accurate while the second hand is moving at two-second intervals.

**Note:** The availability of this function is different depending on the caliber.
